Class Activity

Open the project we worked on in class and complete the following:

- 1) Add a **phone_number** field to the **Student** model.
- 2) Create a page **/students/recent/** that lists students who joined in the last 7 days (you are allowed to change that parameter, e.g. you can put last 3 days, etc.).
- 3) Write at least three queries in the shell (filter, order, delete).

For each task your report must show both the **source code** where you **added the phone_number / created a page / wrote queries** and the **result in the browser**.

Submit **only your report** with these tasks completed.
